

GOVERNOR MILLER SPEAKS AGAINST ST. LAWRENCE SHIP CANAL PROJECT

Tells Waterways Conference in South That It Is Unwarranted Expenditure of Public Money, Impracticable and "Bloc" Pressure on Congress a Grave Menace.

By Telegram to The Freeman. Savannah, Ga., Nov. 16.—Governor Nathan L. Miller of New York state addressed the Atlantic Deeper Waterways Convention here today. His speech was in opposition to the proposed St. Lawrence ship canal and he attacked the scheme from many angles and gave exhaustive data and arguments to prove it was impracticable. The governor said:

It requires some temerity and may seem waste of effort for me to address you in opposition to the project of connecting the Great Lakes and the Atlantic by a deep sea canal. Temerity, because the threat has been conveyed to me that opposition to that project will result in retaliation by the states composing the Great Lakes-St. Lawrence Tidewater Association. That threat does not deter me.

Waste of effort, because that association has announced in a recent bulletin that, if the 18 states composing it so determine, favorable action on that project will be taken by congress this year. Light is shed on the method of accomplishing that project by the statement recently published by one of the proponents of the project to the effect that the different states in the association have appropriated various sums from their respective treasuries, amounting to nearly \$100,000 in the aggregate. "This," he said, "will be used to bring pressure to bear on congress from the business men and farmers of these states as a result of a campaign of education as to the probable effect of the waterways on the development of the middle west."

I do not characterize the formidable character of such pressure. I do not underestimate the power in the congress of 18 states. How that power can be used is shown by a recent communication of the Charleston and Jacksonville Chamber of Commerce to their delegates to this convention, who independently of the merits of the proposition, suggest the wisdom of lining up with the Great Lakes-St. Lawrence Tidewater Association on the principle of reciprocity. They also suggest that the St. Lawrence project is of no concern to the Atlantic Deeper Waterways Association and should not even be discussed at this convention. I shall presently show that it is of the gravest concern to the entire country and has a direct relation to every one of our internal improvements. But I wish to pause long enough to direct your attention to the danger to our country from the promotion of public undertakings on the basis of reciprocity between sectional interests. That method necessarily precludes a fair consideration of any undertaking on its merits. I oppose the St. Lawrence project because I believe that it involves an unwarranted expenditure of the public money. But unwarranted as I believe that expenditure to be, vast as it certainly will be, the amount of money involved even with the strain now put upon the public treasury to meet the current obligations of the government is a mere bagatelle compared with the evil of introducing in the congress of the United States the method of effecting legislation by a combination of local group or sectional "blocs." Our interests have grown so vast and so diverse that it is easy to arouse apparent conflicts where none in truth exists. The fact is that those interests are mutual and our progress depends upon the maintenance of mutual interests, and whilst I suppose some logrolling in river and harbor appropriations is inevitable, I trust that the time has not yet come when the trading of support for local improvements can commit the treasury of the United States to a vast project for the improvement of a waterway in another country regardless of its merits.

The character of the propaganda back of the St. Lawrence project is illustrated by a recent circular of the association favoring it. It says that the engineers' report is altogether favorable and that it was known that it would be favorable. How could it be known except to the discredited of the engineers? In fact, the credit of the engineers is difficult to understand in view of the fact that every report heretofore by every army engineer who has studied that similar projects for a ship canal from the lakes to the sea has been adverse. The fact is, and in justice to the engineers who have made the last report, it needs to be stated, that they have only reported as they were required to do upon the estimated cost of the project and its practicability from an engineering standpoint. No one has ever dreamed that a ship canal would be constructed around the rapids of the St. Lawrence. The engineers expressly say that they proceeded "on the assumption that the expenditure necessary for a depth of 25 feet for navigation is warranted at this time and that the increase in transportation on the St. Lawrence will make it desirable to attain a sufficient depth at some future time." They did not consider, they were not instructed to consider, the commercial feasibility of the project but they have indicated that the project has been submitted to a report altogether favorable to it.

The same circular says that the recommendation of the International Chamber of Commerce will be given effect, in that case the report is distributed in advance, as the commission had appointed a further hearing

when that announcement was made. Now, I sympathize with the desire of our friends of the middle west for better and cheaper transportation, but that need is common to the entire country. The industries of the country are staggering under two burdens, excessive taxation and excessive cost of transportation. It is unthinkable that the burden of taxation will be increased at this time, by a vast expenditure which, in the most favorable aspect, is only an experiment, and it is imperative that we concentrate upon those improvements which will serve the greatest needs of the commerce of the country.

The proponents of the St. Lawrence project have been dazzled by visions. They see the Atlantic coast line extended to Duluth, they see all of the lake ports converted into sea ports, with the flags of all nations flying in their harbors. Naturally they will bring pressure to bear upon congress, naturally they cannot brook opposition and see only crass ignorance or unworthy motives in those who oppose; naturally they are conducting a propaganda country-wide in extent, and the danger lies in the fact that the partisans of the project are too prejudiced, whilst the rest of the country have not sufficient interest to examine the project fairly on its merits. If I can in the slightest degree stimulate intelligent discussion and consideration of this subject I shall be more than repaid for coming here.

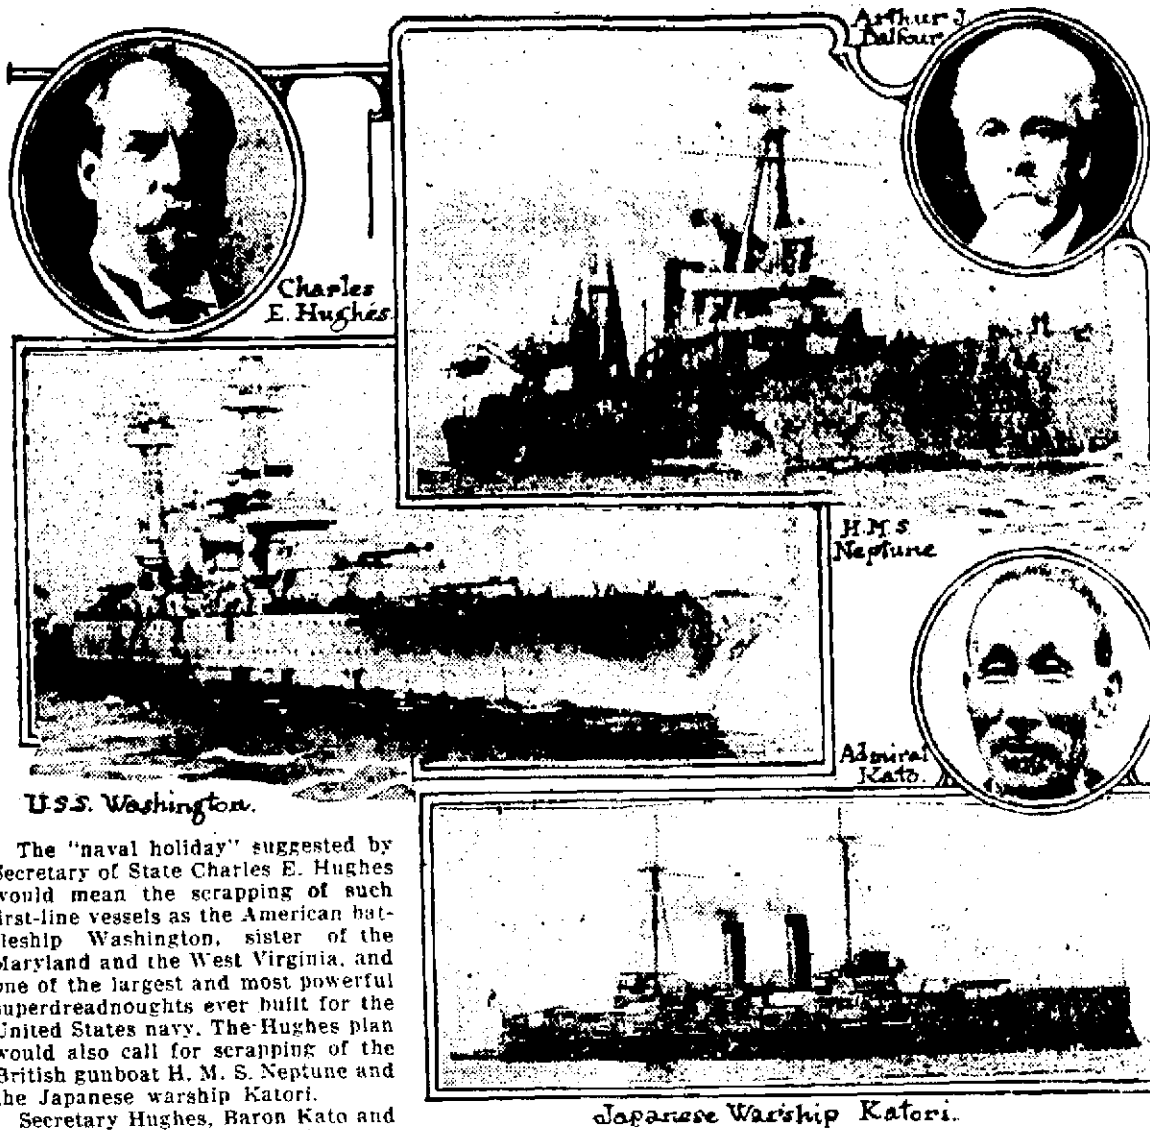

Now, why is this a matter of concern to you?

The engineers have reported that it will cost \$252,778,200 to construct a 25-foot canal and one dam to develop 1,464,000 horse power and that at a further cost of \$17,986,180 the canal can be deepened to 30 feet. In passing it may be noted as illustrative of the sort of propaganda that is being carried on that \$250,000,000 has been heretofore used for the country as the cost of the entire project, including the development of the 4,000,000 (four million) horse-power which is held out as an alluring bait to the New England states.

Well, the engineers, who were instructed to report on channels of 25 and 30 feet respectively recommended the \$252,000,000 25-foot canal as the initial project and so I shall consider the subject from the standpoint of their recommendation. That sum is merely a preliminary estimate. Any one familiar with it is not humanly possible in a preliminary estimate or even after detailed plans have been made to anticipate every difficulty that will arise in the execution of the project and the report of the engineers shows that such is the case. No such work was ever carried on within the estimates, either preliminary or detailed, and it is certainly reasonable to add at least 25 per cent, for unforeseen difficulties, contingencies and unexpected costs. The contribution of the United States to the initial project alone will thus most surely exceed \$150,000,000.

No estimates have been made of the cost of deepening the channels of the Great Lakes and the connecting rivers and no such estimates have been called for. The project depth of these channels now varies from 19 1/2 to 22 feet. The Army engineers have repeatedly reported that the benefits to commerce from deepening those channels will be incommensurate with the great cost involved. Of course, every harbor will have to be deepened accordingly and even though a part of that expense should be borne by the cities interested \$50,000,000 is certainly a modest allowance for the additional expense to be borne wholly by the Federal Government to deepen the channels and harbors to only 25 feet. So that upon the most modest reckoning we have an initial expense of \$200,000,000 to be borne by the United States to deepen the channels and harbors of the Great Lakes and to pay its half of the cost of a 25-foot canal and the development for itself of 1,464,000 horse-power. In passing it should be noted that that is all of the power that this country can claim because further development will be entirely in Canadian waters.

Now, my proposition is that such an expenditure is not warranted at this time even though the project were otherwise commercially feasible. That sum is one-fifth of the total amount that has been expended in the improvement of our rivers and harbors during the entire history of the country. Without counting some approved projects, for which estimates are lacking, it will require nearly \$200,000,000 to complete the river and harbor improvements which have already been approved both by the army engineers and by congress and are still held desirable. Appropriations for rivers and harbors for the last 20 years have averaged about \$20,000,000 a year, and at that rate of outlay, and in the present condition of the treasury we can hardly expect faster progress. It will take at least seven years to complete the approved projects and we may be assured that there are many not yet approved which would well be undertaken. The approved projects concern only harbors on the Atlantic Gulf and Pacific coasts, and the Great Lakes and every project capable of serving the needs of

U.S.S. Washington. The "naval holiday" suggested by Secretary of State Charles E. Hughes would mean the scrapping of such first-line vessels as the American battleship Washington, sister of the Maryland and the West Virginia, and one of the largest and most powerful superdreadnoughts ever built for the United States navy. The Hughes plan would also call for scrapping of the British gunboat H. M. S. Neptune and the Japanese warship Katori.

The U. S. S. Washington was launched September 1, 1912. She displaces 32,000 tons and mounts eight 16-in guns in her main battery. Her secondary battery consists of fourteen 5-inch rapid-fire guns. She has 28,000 horsepower, is electrically driven and develops twenty knots an hour. She carries a crew of 1,000 officers and men.

H. M. S. Neptune, launched September 30, 1909, is 545 feet long, with a 19,900-ton displacement. She has 28,000 horsepower and averages twenty-two knots. She carries ten 12-inch guns, sixteen 4-inch, two 3-pound anti-aircraft guns, five machine guns and several torpedo tubes.

The Katori, built July 4, 1905, is 455 feet long and displaces 15,950 tons. She develops 18 1/2 knots. She mounts four 12-inch guns, four 10-inch and twelve 6-inch guns, three 3-pounders, twelve 12-pounders and carries numerous torpedo tubes, five submerged. She carries a crew of 864 men and officers.

FORD WOULD BUY SCRAPPED SHIPS

At Junk Prices—Needs The Metal And Can Finance Scheme If Entire Navies Are Condemned—Hughes Proposal Doesn't Go Far Enough.

By Allan L. Benson. (Copyright 1921 by the International News Service.)

By Telegram to The Freeman. Detroit, Mich., Nov. 16.—Henry Ford today authorized me to make the following sensational announcement upon his behalf.

"I will buy the navies of the world at junk prices," he said, "and turn them into agricultural machinery and automobiles if the United States and the other powers will agree to disarm on the sea."

"You may tell those gentlemen in Washington that I mean business. They may think that I could not finance such an undertaking, but you may tell them that I can. You may assure them that with acetylene torches and electricity I can cut these warships to pieces and make useful things out of them."

Mr. Ford's announcement came as suddenly as did the world famous announcement of Secretary Hughes with regard to the limitation of sea power. We were at his tractor plant at Dearborn talking of many things. In the course of the conversation, I asked him what he thought of the Hughes proposal. He said it was all right except that it did not go far enough. He expressed the opinion that there should be complete disarmament on the sea. Then he authorized the announcement to buy all of the warships afloat.

"To buy those ships," he continued, "would be only to get some of my raw materials for a while from a new source. I am spending great sums all the while to get ore out of the ground and make it into steel, and I might just as well buy the metal in those warships as to buy metal anywhere else."

"I wish you would make it plain that I stand ready to buy, at junk prices, any and every warship that the United States and other powers may think of sinking. Please ask them not to sink a ship. I understand that some of the captured German ships were sent to the bottom. It is a crime to sink metal like that. The world has need of it. So please state that even though the powers should be willing only partly to disarm on the sea, that I will buy whatever ships they may agree to withdraw from their navies."

"But they ought to scrap the whole lot. There is no reason why a warship should be left upon all the oceans in the world. If these diplomats mean business, they will accept my proposition and disarm. These diplomats say they want naval forces only as protection. Each one denies that he wants for purposes of aggression even the remnant that the Hughes plan leaves each nation."

Well, if that is the case, why should all of the governments sell their ships to me? I'll promise not to use them to fight anybody with, I'll melt them up and make them into things that will make life better instead of worse. Put the American fleet into my hands and Japan need never be afraid of it again. Put the Japanese fleet into my hands and America need not be afraid of it. Put the British fleet in my hands and neither America nor any other nation need fear it. With these fleets in my hands no people would be taxed to maintain them. Nobody would be harmed and everybody would be benefited.

"If the powers will sell me their ships I will help them solve their unemployment problem. The unemployment problem is going to be worse even by the disarmament plan than Mr. Hughes proposes. If warship building is going to be stopped for ten years, thousands of men who are now working in steel mills and shipyards will be deprived of employment. Something should be done for these men. I will do something for them if the powers will sell me their warships. I will not only give employment to thousands more men in my tractor and automobile works, but indirectly, I will give employment to many more thousands. When I employ men to make a tractor, for instance, I cause employment to be given to the railway men who take to market the wheat that the tractor helps to grow, the millers who grind it, the bakers who make it into bread, the clerks who sell it and to the drivers of delivery wagons who take it to the homes."

"It is a very dangerous thing to have in existence any fraction, however small of existing navies. Each of these parts, if left, will ultimately be expanded into a big navy again and we shall have the present situation all over again."

The world does not need any of these ships. I need all of them. If I can buy them I will manufacture things that will make people happy instead of sad."

Executive Federation Meeting. There will be an important meeting of the executive committee of the Kingston Federation of Women's Clubs at the Kingston Club on Thursday afternoon at 2:30 o'clock. At that time arrangements will be made for the coming Third District Federation meeting to be held in the First Dutch Church next Tuesday, a full attendance is urged for the executive committee meeting.

Will on Wrecked Car. Louis Kogler and Ella Kogler the wife of this city have sold to Nettie C. Marsh, all their property and personal effects on December 4.

ARMS CONFERENCE WORKING SECRETLY

Delegates May Speak Minds Freely Behind Closed Doors Where Naval Reduction and More Delicate Far East Problem Are Being Discussed.

By Telegram to The Freeman. Washington, D. C., Nov. 16.—Negotiations in the armament reduction and Pacific conference have turned today into channels of secrecy. The old policy of working out decisions behind closed doors, and then announcing them to the public, so the European diplomats gathered here, is being followed.

The two great problems confronting the conference: (1)—Naval reduction, and (2)—Far East issues, are both under consideration behind closed doors.

Whether the whole discussions in the meetings of the conference committee of the whole—the committee on Far East affairs—ever become public, is doubtful. They are being carried on informally in the nature of international conversations.

It is not even certain that a stenographic report of them will be kept. Questions of the utmost delicacy are involved and diplomats, like politicians dread the future publication of utterances in private which might embarrass either themselves or their countries.

While America's Far East problem will be given out in due course of time, there is little likelihood that the counter proposals which it evokes will ever become public. A question of international courtesy is involved here precluding the publication of the counter proposals of the foreign powers unless they themselves announce them voluntarily.

Statements like A. J. Balfour, Aristide Briand, Rene Viviani, Dr. Van Karnebeck, and the ambassadors attached to the various foreign delegations, are sticklers for diplomatic form, which means negotiation in secret.

Unless there is some unexpected leak, it is obvious that the intimate details of the committee conversations will remain a diplomatic secret. The predicament of President Wilson at the Paris peace conference when he told his colleagues in secrecy that the American fleet would cross the Atlantic if the peace of the world were again menaced, was recalled. That utterance was intended only for the ears of some of the peace delegates but it leaked out. And it created a tremendous sensation at home. Incidentally it led to a controversy over the question of secrecy. That it was pointed out, was an example of the kind of thing the delegates here wished to guard against.

"Diplomatic secrecy" as a basis for the discussions of the Pacific and believed to be especially pleasing to Japan, and it was expected that Japan would have suggestions or counter proposals to make concerning a great deal of America's Pacific program.

Furthermore, such privacy would enable Japan to link up the naval reduction plan with her own far east proposals. In the way of asking conditions, without giving to the public the appearance of opposing limitation of her navy.

"Diplomatic secrecy" also would give America greater freedom of movement in her crusade against the Anglo-Japanese alliance.

China, long delayed a hearing, comes into her own today. She is now given an opportunity to present her proposals, understood to be about thirty in number, for the protection of her sovereignty and her territory. The Chinese delegation, although appointed by the Peking government which is at war against the South China or Canton government, claims to represent the whole of China.

The Far East was passed over entirely in the two open sessions of the conference. Both Britain and Japan have pledged their support to the fundamentals of the naval reduction scheme, but in the case of Japan there is an interlocking of naval and Far East interests.

Supporters of "diplomatic secrecy" declared that sudden revelation of America's specific aims in the Far East before the opinions of the foreign powers were sounded, endangered the aims of the conference.

Our Growing Population. The following births have been reported to the board of health:

Mr. and Mrs. Jacob Roseman, 37 Chambers street, a son, Samuel, born at Kingston City Hospital.

Mr. and Mrs. Samuel Rosen, 10 Chambers street, a son, David J., born at Kingston City Hospital.

Mr. and Mrs. Harry J. Rosen, 107 Port Street, a son, Walter Rosen, born at Kingston City Hospital.

Mr. and Mrs. Edward A. Smith, 112 Indian, a daughter, Leahy Clarke, born at Kingston City Hospital.

Mr. and Mrs. William Tread, 29 Ann street, a son, Thomas Edward.

Liberty Bond Interest Due. Millions Use "Gets-It" For Corns

Stops Pain Instantly - Removes Corns Completely.

Everybody, everywhere needs to know what millions of folks have already learned about "Gets-It," the guaranteed pain-

End Your Corns With "Gets-It." No matter how deep rooted, disappears quickly when "Gets-It" arrives. Wonderfully simple, yet simply wonderful, because all sores stop with the first application. Get rid of your corn and your shoes that fit. Big shoes simply make corns grow larger. Your money back if "Gets-It" fails. Insist on the name "Gets-It" but a little everywhere. C. & C. Co., Chicago.

Fine for Neuralgia

Musterole insures quick relief from neuralgia. When those sharp pains go shooting through your head, just rub a little of this clean, white ointment on your temples and neck.

Musterole is made with oil of mustard, but will not burn and blister like the old-fashioned mustard plaster.

Get Musterole at your drug store. 35¢ 65¢ in jars & tubes; hospital size, \$3. BETTER THAN A MUSTARD PLASTER

RHEUMATIC TWINGE MADE YOU WINCE!

USE Sloan's freely for rheumatic aches, sciatica, lumbago, overworked muscles, neuralgia, back-aches, stiff joints and for sprains and strains. It penetrates without rubbing. The very first time you use Sloan's Liniment you will wonder why you never used it before. The comforting warmth and quick relief from pain will delightfully surprise you.

Keep Sloan's handy and at the first sign of an ache or pain, use it. At all drug stores—35c, 70c, \$1.40.

Sloan's Liniment

Endorsing hotel proprietors are hereby notified by Dr. J. B. Sloan, M.D., that Sloan's Liniment is a pure, safe, and effective remedy for all rheumatic aches, sciatica, lumbago, overworked muscles, neuralgia, back-aches, stiff joints and for sprains and strains. It penetrates without rubbing. The very first time you use Sloan's Liniment you will wonder why you never used it before. The comforting warmth and quick relief from pain will delightfully surprise you.

Free Medical Advice. Have your tonsils cut out and you won't have tonsillitis; have your head cut off and you won't have headache.

Taking No Chances. "Do you carry a bumper on your auto?" "Nix, the federal agents are getting too active."

Since mother and daughter have their hair bobbed, we suppose father is welcome to use all the hair pins in the house to fix the car.

It Does Not. "Your new stenog is a beauty. Can she spell?" "Does it matter?"

Some men of 60 feel like 30, but more of them feel like 30 cents.

About the only thing a fellow can think of in a room in a small town hotel is how long that carpet has been on the floor.

Sign in window of electric supply shop in Poughkeepsie. "Why Kill Your Wife? Let Electricity Do It."

Ethel—"Did you have the porch seat painted yesterday?" Father—"Yes—why?" "Well, Harold and I sat on it last night and Harold got paint on his trousers."

What has become of the old beer stein that used to collect dust on the mantelpiece?

An Appropriate Air. He pounds his wife and she pounds him. And when the row is done They hold each other's hands and sing, "Two hearts that beat as one."

All men admire women, no matter what they say, but a bachelor just feels he is wise in doing it at a safe distance.

No Wonder. Little Johnnie—Mamma, where do the lights go when they go out? Mother—My son, you might as well ask me where your father goes when he goes out.

Another thing these modern "re-veal everything" style of clothes are shown is that all the family skeletons are not kept in the closet.

It all comes out in the wash.

OUR DAILY PATTERN.

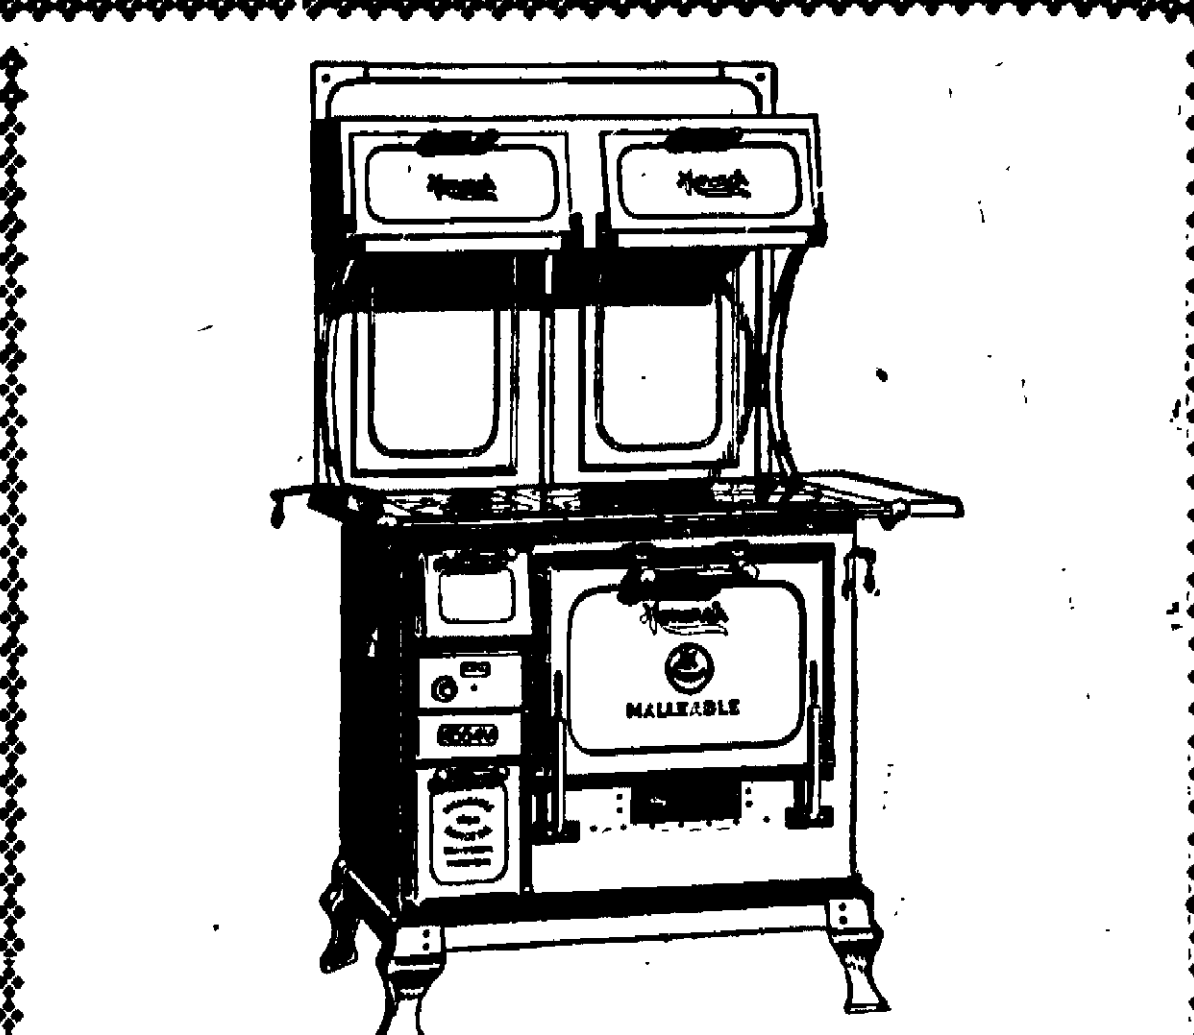

A Pretty Frock For Mother's Girl. Pattern 2842 is here shown. It is cut in 4 sizes: 8, 10, 12 and 14 years. A 10 year size will require 2 1/2 yards of 24 inch material. Gingham, percale, chambray, lawn, dimity, pongee, serge and suiting could be used for this model. The dress may be in wrist or elbow length.

A pattern of this illustration mailed to any address on receipt of 10 cents in coin by the Pattern Department, The Freeman, Roadout, N.Y. Be sure to state size wanted.

Catalogue Notice. Send 15c in coin or stamps for our up-to-date spring and summer 1921 catalogue, containing 350 designs of Ladies' Dresses and Children's Patterns, a complete and comprehensive article on dressmaking, also some points for the needle (illustrating 10 of the various, simple stitches), all valuable hints to the home dressmaker.

Money in Cocaine. In the last few years a strong and growing interest has developed in cocaine culture in the Philippine Islands. It is only the nature of the thing, and therefore a dangerous business in the industry. It is therefore impossible for the prospective planter to either purchase or lease a breeding coconut grove, but large areas of virgin land are available for new plantations, more especially in the Moro provinces, where conditions are ideal for cocaine culture.

Come In And See The New MONARCH Range

Its graceful lines will appeal to you—IT IS EXCEPTIONALLY ATTRACTIVE. BUT, the MONARCH is more than good looking—it is built for service and economy. Malleable iron as used in the MONARCH insures lasting satisfaction and reduced fuel bills. We are offering some wonderful values so come in and see the

 KINGSTON, N. Y., NOV. 16, 1921.

HALEY AND JONES.

Haley and Jones belong in the galaxy of devoted friends in which history and tradition have placed the linked names of Damon and Pythias, Achilles and Patroclus, Jonathan and David, Pylades and Orestes, Castor and Pollux, Nias and Eurymachus. Haley, at any rate, was a *fidus Achates* to match the best of them. It seems that Harry W. Haley, a bachelor, serving in the British army, had as "buddy" Thomas G. Jones, an American, married and the father of a child. When Haley fell in battle with a German bullet in his leg Jones dragged him to safety at the risk of his life. When Haley, after his discharge, met Jones in Canada, a fugitive with a sentence for desertion on his head, he insisted on paying the battle-field debt by taking his friend's place in a Leavenworth cell. And he actually served most of the term before his identity was discovered.

Condemned to death by Dionysius, Damon was allowed to go home and arrange his affairs, his friend Pythias remaining as security. Damon being delayed, Pythias was led out to execution, but in the nick of time and at the dramatic moment the faithful Damon turned up. The tyrant of Syracuse was so moved by the spectacle of this beautiful friendship that he pardoned both young men. Our army authorities are less given to sentiment and in this instance military discipline will not be relaxed. It is announced that Jones must now take his place in the cell and serve the full term. Haley's self-sacrifice was as remarkable as anything of the kind on record. Though Jones's acceptance of it can not be admired, his gallantry on the battlefield entitles him also to mention on the list of devoted friends. The story of Haley and Jones deserves permanent record.

HISTORY IN SCHOOLS.

The principals and teachers of the New York public schools have been directed to examine carefully all school histories to make sure that statements made in them as to "property" be retained, the investigating committee presumably being more interested in political propriety than any other kind. This is a large order, but the teachers will be less severely taxed than they would be if asked to verify and make sure of the truth of every statement, with all the research that would involve. As to matters of recent history there are many and varying opinions, and for fifty years after the events discussed the character of a historical work largely depends on the political leanings of its writer. The New York teachers may be thankful that the task of verification is not laid upon them.

To insure even political propriety is a task that bristles with difficulties, for what one group of protesting citizens regards as improper another group is ready to accept. For example, people of old American stock are now willing for school children to read an occasional friendly reference to England after a century of peace, but the Irish and German groups want plenty of "England-we-hate" instilled into the minds of the young. The members of every hyphenated group want their mother country glorified and its ancient or late enemies left without a leg to stand on—in both the school books and in political history. A large part of America is still composed of mutually unfriendly fragments of Europe, which renders a purely and generally accepted American viewpoint in both political and school histories well nigh impossible of attainment.

The people can look for more of a reduction in state expenses next year. A Republican Legislature will do its part to eliminate waste and extravagance, and what the Legislature does not do will be done by the governor. Last year, it may be remembered, there were those who said what could not be done. Governor Miller said what could be done, and he slashed \$35,000,000 out of the budget. Here is the big test: He promised to further reduce expenses this year, and he will. Governor Miller has a long list of

state affairs. He started studying state finance when he was comptroller.

When the Civil War broke out the farmer left the plow and went forth to enlist to protect his country. When subsequent disturbances occurred he did the same thing. Last week the returns showed that he left the farm to protect the count and that he helped is proved by the returns. The farmer is not the only one who thinks but he does some thinking just the same. He reads his weekly newspaper, and that helps.

The people who are interested in deeper waterways in this section of the country will know more about New York state's large canal and the state's resources after reading Governor Miller's speech to the members of the Atlantic Deep Waterways Association at their meeting in Savannah, Georgia. The governor knows this subject like a book and he is not going to let the St. Lawrence project get a foothold if he can block it, and he is not afraid to say what he thinks of this proposal. It is not the purpose of the governor to permit New York state to pay thirty per cent toward financing a foreign proposition. The governor was born and reared in New York state, and for that reason he is for the state first, last and all the time.

Burroughs Nature Club Notes

Copyright 1921.
 By ROUGHTON HIFFLIN CO.

What do you want to know about Nature Subjects? Send any questions of general interest to the Nature Notes Dept. of this paper. Look for answers in this paper. Look for answers in this column.

Can You Answer These Questions?

1. Is it good for pet rabbits to give them a bath in the summertime?
 2. What is a katydid, and from what form of animal life does it come?
 3. Why are different species of birds different colors? I don't mean different coat in the different sexes, but in different classes, as robin, bluebird, etc.

Answers in Tomorrow's Nature Notes.

Answers To Previous Questions:

1. Kindly state how oysters are gathered or fished?

The old-fashioned way was to use tongs, from a small boat, and in rather shallow water. The tongs were something like two rakes, teeth inward and could grasp a fairly large cluster by scrapping along the bottom of any oyster bed. The more modern way is to use a dredge operated by an engine from a bigger boat. It is a sort of iron basket and can scrape up much bigger clusters of oysters than the hand tongs could.

2. Does the ibex live in America?

No, it belongs to the Alps and the Himalayas. But some persons mistake the female mountain sheep of the Rocky Mountain regions, an "ibex," perhaps confused by its horns. The male bighorn, or mountain sheep, has horns that curve around till the tips are almost below the base of the horns. The female bighorn has smaller horns that curve slightly backward, something like those of the ibex, but much less prominent and ridged.

3. Can young cedar waxwings be domesticated? What do they eat?

We have seen them in a zoological garden, but hope never to see one caged by a private party. The cedar waxwing is a sociable bird, usually travelling in flocks, and would be intensely unhappy in solitary confinement. In nature they eat small fruits like cherries and berries, and toward the late summer "turn fly-catcher" as Mr. Burroughs writes, taking insects.

SHANDAKEN.

Shandaken, Nov. 16.—Mrs. Ella Coons, who has sold her place to George Jocelyn, has gone to Kingston to spend the winter with her daughter, Mrs. H. F. Whitney.

Our supervisor, W. D. Coons, is attending the sessions of the board of supervisors at Kingston this week.

Christian Endeavor business meeting at the church hall on Wednesday evening of this week.

The Rev. G. F. Wells, pastor of the M. E. Church, will attend the meeting of the Boy Scouts on Friday night, November 18, to organize. The meeting will be held at the home of C. E. Wood.

Quite a number of deer have been shot in this town this season. George Bishop, of the board of water supply at Gillies, shot a deer while camping at Fox Hollow recently.

Church services next Sunday. Thanksgiving services will be held and an appropriate service will be preached by the pastor. Sunday school at 10 o'clock, preaching at 11 o'clock and Christian Endeavor in the evening at 7:30.

TWENTY AND TEN YEARS AGO.

Nov. 16, 1891.—The Rev. Charles G. Ellis accepted call to Rensselaer Presbyterian Church.

Thomas J. Fallon elected treasurer of School District No. 2. Kingston Academy and Eastman's College football teams unable to meet in game here.

Nov. 15, 1911.—Beds of Andrew Hackett found in Rensselaer creek. The bed being located near October 25. Under Hackett's apartment record of state conservation commission.

Arthur S. Dettloff and Mary Grace E. McCord married at New Paltz.

An important note: We would all be glad if we were surrounded by the things we loved in the sunniest.

**THE
FREEMAN**

The stars represent 11 factories; the dots represent the 1000 Fleischmann distributing stations, from which the daily delivery of fresh Fleischmann's Yeast is made possible.

Delivered daily from 1000 distributing stations by 2000 trucks.

So that you can get it
fresh every day—

*This tiny plant is grown rapidly
day and night and delivered
to you fresh every morning*

Only two other foods—milk and fresh meat—can boast a delivery system approximate to that of Fleischmann's Yeast. Milk is distributed by thousands of local companies; the extensive delivery of fresh meats is carried on by a large number of packers; the delivery of Fleischmann's Yeast, fresh daily, to all sections of the country is carried on by the one company alone—The Fleischmann Company.

YOU are probably one of the ten millions in this country who are eating Fleischmann's Yeast daily.

Have you ever stopped to realize what it means—that you can get Fleischmann's Yeast fresh every day?

In the first place, did you know that this little yeast cake you eat daily is really a plant—a fresh food?

Fleischmann's Yeast is not made—it is grown. It is a tiny plant that has a wonderful way of growing with such rapidity that in 24 hours it has grown 20 times its own weight.

To get this fresh food to you The Fleischmann Company has built up under one organisation an unrivaled system of distribution.

By this system 11 centers throughout the country are kept working at capacity to grow enough fresh yeast daily to meet all needs. From these centers the yeast is shipped daily by special express.

One thousand distributing stations pack

the fresh yeast daily into 2000 trucks which deliver to grocers, bakers and delicatessen stores.

The fresh yeast is placed directly in the refrigerators of 200,000 grocers and 30,000 bakers.

The Fleischmann delivery salesman is *always* there on time. No baker has ever had to delay his baking because of not receiving Fleischmann's Yeast. Even in the ordinary routine of everyday life, the operation of such a system is a gigantic task. Yet the Fleischmann service has shown itself equal to the greatest emergencies.

During the recent Pueblo flood, Fleischmann's Yeast was the first food taken into the city. The Fleischmann salesman was in there with his yeast for the bakers even before doctors and hospital supplies could be rushed from other cities.

Why fresh yeast is now a part of the national daily diet

Fleischmann's Yeast is a corrective food which supplies in fresh form rich quantities of the water-soluble vitamins, for yeast is its richest known source.

Fleischmann's Yeast helps build up body tissues and makes the body more resistant to disease.

In addition, because of its freshness, Fleischmann's Yeast helps the intestines in their elimination of poisonous waste matter.

Fleischmann's Yeast has made the use of laxatives unnecessary for many who have long been in bondage to laxatives. For many others it has corrected the various symptoms of rundown condition and restored a health and vigor unknown for years. THE FLEISCHMANN COMPANY, 701 Washington St., New York.

Emergencies which the wonderful Fleischmann Service has met

The Dayton floods in 1913—During the disastrous Dayton floods in 1913, when all established means of transportation were destroyed, Fleischmann's Yeast was delivered by automobiles, motorcycles, boats and by man on foot.

Boston paralyzed in 1914—When severe snow and sleet paralyzed traffic in Eastern territory in 1914 Fleischmann's Yeast was the only commodity delivered in the city of Boston for three days.

Babies cut off by tidal wave—When a tidal wave cut off Hattah from all communication, the Pfistermann Service sent special messengers with yams from Chicago and secured tags to move yams from New Orleans to the stricken city. The infants were

thus enabled - to take bread for the people
without any interruption.

The whole country storm-swept in 1917
—In 1917, when one of the most severe storms ever recorded swept the whole country, Fleischmann's Yeast was delivered promptly in special trains, special electric cars, trucks and passenger automobiles from the big Fordhill factory.

KINGSTON ROUTE SAVES MOST GAS

Packard Test Shows Greatest Mileage per Gallon of Gasoline on New York-Kingston Roads.

The advantage of good roads over poor roads for saving wear and tear and in gasoline economy does not need to be demonstrated to the owner of any automobile, but the advantage of one section over another does need practical demonstration, which has been given by the Packard automobile manufacturers with a Packard Single-Six with results most flattering to the section between Kingston and New York, where the highest average mileage per gallon of gasoline was obtained in a run covering a total of 1,431.4 miles.

Convincing proof in the gasoline economy record established by a Packard Single Six touring car was furnished by the Packard manufacturers in a recent six-day test. The car used was taken out of stock. Three drivers took turns at the steering wheel from day to day. Despite the fact that the run during one day was made in the teeth of a forty-mile gale and another was completed with the hood and body covered with snow, the car hung up a grand average of 22.15 miles to the gallon.

The daily record of the car was as follows:

New York to Kingston and return: Average 23.5 miles to the gallon for 200 miles.

New York to Springfield and return: Average 23.3 miles to the gallon for 296.8 miles.

New York to Albany and return: Average 22.1 miles to the gallon for 315.3 miles.

New York to Delaware Water Gap and return: Average 21.3 miles to the gallon for 212.3 miles.

New York to Philadelphia and return: Average 21.3 miles to the gallon for 211.6 miles.

New York to Southampton and return: Average 21.1 miles per gallon for 205.4 miles.

The Packard test answers the question: What are the best roads in the Metropolitan district?

Once more Kingston scores another hit with the motorist. There will be another hit scored with the opening of the Rondout Creek Bridge and the completion of the short stretch of highway connecting the state highway at Port Ewen with the Esopus end of the bridge.

New York city motorists are interested in the run which can be made over the week-end and given a variety of scenery and afford good accommodations. But the interest is not confined to the New York city or even the Metropolitan district motorist, but every motorist in the country is interested in the economy tests and naturally in the cars which make them. During the past summer Ulster county was visited by thousands of motorists who had heard of the beautiful scenery and the excellent accommodations of the Catskill-Shawangunk Mountain district. The construction of the Storm King road and the completion and opening of the Rondout creek bridge add to the beauty and accessibility of a day's run for the Metropolitan district and during the coming season Ulster county will come into still greater favor, particularly with the already enviable reputation which the city has for more good streets than any other city of its size anywhere.

In the economy test made by the Packard Single-Six, roads and weather were taken as they came and the run was under actual owner conditions. The smooth going over concrete was offset by the churned mud of innumerable detours. There was just as much difference in the weather conditions, the sun shining on one day and rain and hail falling on the next. The manufacturers announce that the hood was not raised once to make a repair or the slightest adjustment. The total amount of gasoline consumed in the six days was 64.75 gallons, representing an outlay, with gasoline selling at the New York city price of 29 cents a gallon, of \$18.77 for the 1,431.4 miles traveled. The grand average of 22.15 miles to the gallon of gasoline exceeds by better than five miles the average claimed for the Packard Single-Six by its manufacturers.

ON-A-JOB, OFF-A-JOB JIM

Being a Story
Of how Jim got on a job and why he got off it again.

The captain of the life saving crew was swearing so lustily that Jim's curiosity was aroused, and he asked the reason for the profanity.

"See that wall down there," pointing to the sea wall below the station. "The waves are undermining it, and chances are the first bad storm this winter will completely demolish it. Ever hear the saying, 'Stitch in time—' That applies to the wall. A little work will mend the breach. If it isn't patched up now well! He turned away with a gesture of despair.

"Why don't you have it fixed now then?" asked Jim.

"Why? Because there is no appropriation this fall for the wall. They'd rather cut and spend five hundred dollars on it next spring, after the ocean has done its best to knock it down, then spend fifty dollars repairing it this fall."

"Couldn't you have it done and send the bill in as current expense?"

"I could if I was a handy man about the place, and know how to go about mending the wall, but I don't know anything about it. My task is life-saving, not wall-mending."

"And now in job-getting, so I'll take over the contract at once. First two days, build moles and plank-best; next two days, buy cement work, fill barrels. We had better not use this sand with the cement. It's too fine. Any place near here where we can get gravel?"

"Tom Morley has a gravel pit down the road a bit. He'll bring over all you'll need."

"How about lumber?"

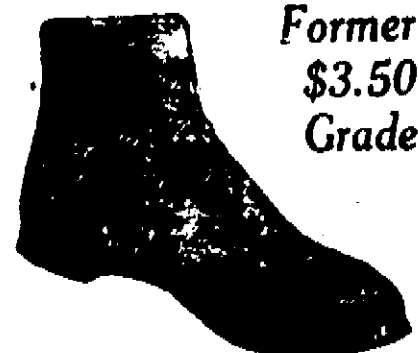

"In Baltimore, where formerly typhoid fever was so prevalent, only 270 cases were reported last year, and of these it was definitely proved that 50 were brought there from other places. The deaths numbered 35. In 1920 there were 225 deaths."

YOU KNOW WHERE THEY ARE WHEN YOU WANT 'EM, FELLOWS

Thousands of women of New York, carrying striking banners, paraded through the streets of New York recently, demanding total, instead of limited disarmament. The parade was held under the auspices of the Women's Peace Society and the Women's Peace Union.

"Will you need new material?"

"Not for moulds, no sir!"

"Look in the shed. It's loaded with planks of all kinds. You'll find nails and hammers there too."

Jim hurried over to the shed. He wanted to complete the carpentry end of the job within two days. The wood required considerable handling however, and it was noon before he had got out enough satisfactory lumber to do the job. Directly after dinner he attacked his job with fresh vigour, and by night had built and braced a number of the forms around the broken places in the wall.

He worked all the next day and was just ready to tackle the boat when the captain spoke. "Afternoon tea is now being served."

"Oh sure," laughed Jim. "Will you have lemon or cream?"

"That's a fact, Tea. In the station. My daughter drove round especially to see the handsome Mr. Jim Lawrence. She always served tea. I was sent to bring you in."

"I'm sorry, cap, but you'll have to take in my regrets."

"You don't care to meet my daughter?"

"I don't care to meet anyone, in this condition. She'll have to excuse and forgive me."

"You don't know Betty. She expects her orders to be obeyed."

"Can't help it this time. My work has to be completed before dark."

Jim forgot all about the captain's daughter till much later, when he went in for supper. The old man shook his head at Jim.

"You wait, Betty will make you pay for this," he warned.

"Shall I call and make my apologies?"

"Too late. Better take my advice and do otherwise next time you are invited to tea. A woman scorned is an enemy made. If I know daughter Betty, you'll soon be given proof of that."

Jim chuckled. Women never appeared formidable to him. He wasn't worrying.

SUPERVISORS TABULATE RETURNS

The board of county canvassers met at 2 o'clock Tuesday afternoon, to which time they had recessed. Chairman Saccardoff presiding. Robert J. Howard, of the board of elections, being clerk. After roll call those not shown in at the noon session took the oath. Chairman Saccardoff named the following committees:

On Examining Returns—Messrs. Heaton, Frutcher, Coons.

On Reading Returns—Shufeldt, Avery, Puritan.

On Tabulating Returns—Conklin, Miller, Eris.

The supervisors were then requested to hand in the election returns from the respective towns, and Supervisor Frutcher moved that should any of the returns from districts be missing that those filed with the board of elections be used.

On motion of Supervisor Frutcher the board of canvassers then took a recess until 3:30 o'clock so that the committee on examining the returns could do so and then report when the board reconvened at hour recessed to.

The committee on examining returns reported that all the returns were there and the work of tabulating was then begun by the committee.

The Joys of Autumn

INCREASE WHEN PROPERLY SHOD

Your personal comfort and the conscious feeling of correctness in attire depend so much upon footwear that you owe it to yourself to see you have the correct shoes on your feet.

Do this now and you will be happily served and suited—for our fitters are trained to assist you in choosing the particular types of shoes adapted to your needs and purposes. Our stock is very complete at the present time both for ladies' and men's wear.

NEW JUDGESHIPS
SEEM PROBABLETwenty-three more Federal judg-
ships will be created under the
Walsh bill, which was ordered by
the House Judiciary Committee to
be favorably reported at Wash-
ington on Tuesday. Similar legislation
is pending before a Senate Commit-
tee and has been recommended by
Attorney General Daugherty and
Chief Justice Taft.The Walsh bill provides for two
more judges for the Southern Dis-
trict of New York, which includes
the counties of Columbia, Dutchess,
Greene, New York, Bronx, Orange,
Putnam, Rockland, Sullivan, Ulster
and Westchester.Sometime ago a bill to divide the
Southern District and to create a
new district of the up-state counties
died a natural death in Congress,
since which time it has been un-
derstood that Congress would create
two more judgeships for the district.

A TAXI CHAT

PROMPT, SAFE, COURTEOUS SERVICE

In a former advertisement we told you WHY we were

NOT THE CHEAPEST Taxicab Service in this city. We

will explain further.

In addition to the High Grade Service we maintain, we

have just installed in each of our new enclosed Limousine

Taxicabs the most modern heater produced—thus insuring

passengers the comfort and warmth of your home on

cold, unpleasant days and nights. Furthermore we pre-
sent to each passenger daily, the "Kingston Leader" morn-
ings; the "Kingston Freeman" afternoons, and the "New
York Evening Telegram" evenings—just a little inexpen-
sive courtesy to our patrons—yet one that is appreciated.We invite the traveling public to place their early morn-
ing calls with our night manager. This Call Service is
free of charge and absolutely dependable if your telephone
is in proper working condition. Passengers for trains or
boats have never missed their connection—(as a result of
our negligence) since we have operated this company.
Rather an enviable record, we think!Our new enclosed funeral and wedding cars are beau-
tiful, and are priced as follows: 2-passenger limousines,
\$4.00; 4-passenger sedans, \$5.00; 6-passenger sedans,
\$6.00.

KINGSTON TAXI SERVICE

BIG AUDIENCE
AT BIRD LECTURESt. John's Parish House was
crowded to the doors on Tuesday
afternoon, in response to the invita-
tion issued by the Elster Garden
Club to its open meeting when Mr.
Fischer of the Natural History
Museum of New York city, gave his
illustrated talk on birds. Mr.
Fischer is a delightful talker, with
a rarely pleasing voice and conversa-
tional manner, and the colored
slides he showed were rarely beau-
tiful and interesting. Why, he al-
most convinced the audience that
Christopher Columbus owed his
final discovery of America to the
golden plover, and the circumstan-
tial evidence was pretty good, at
that. The golden plover lives in
Labrador regions in the summer,
then in the early fall flies all the
way to South America, returning
north in the spring, but by way of
the Mississippi river and other water
ways. Columbus and his men saw
the golden plover, it is supposed,
quite far north, out over the open
sea, but recognizing them as land
birds, realized that they were flying
toward land and followed their
flight with the story goes, and the
story of the golden plovers them-
selves is certainly a remarkable
one.

Then Mr. Fischer showed pictures

of some of the birds we love for the
beauty of their songs, our northern
thrushes and the southern nightin-
gale. Nests and young birds were
also shown and created vast inter-
est.Then came a remarkable chapter,
so to speak, on the Egret, both in
its native haunts and in Van Court-
landt Park. These wading birds
came under the head of those ad-
mired for their plumage, the
allegre, now banned by law, hav-
ing formerly been obtained by kill-
ing the parent birds in the breeding
season.Under the division of birds who
to humans have a dollars and cents
value, were the woodpecker eating
birds, the mourning dove, the finches
and the sparrows. Some delightful
owl pictures were shown, these birds
earning their right to respect by
eating mice, gophers, etc.Among the scavenger birds were
shown the turkey buzzard and the
herring gull, both of whom the
speaker thought should be made
members of our boards of health.Then there were the insect-eating
birds who save the most for their
human friends in money value.
Warblers, tree swallows, both the
black and yellow billed cuckoo, the
Baltimore orioles and the grosbeaks
came under this head. After show-
ing these birds, Mr. Fischer told of
various ways of attracting birds to
our gardens and thus gaining their
allied help. Bird boxes to take the
places of the fast disappearing holes
in tree trunks as bird apartments,
was one suggestion; bird baths, so
placed as to be safe from house cats,
was another. Mr. Fischer closed his
delightful talk by showing a picture
of the bird monument in Salt Lake
City and telling its history. The
Mormon pioneers planted their first
grain crop only to have it complet-
ly destroyed by a grain beetle. This
was a tragic loss for they had but
little grain for a second planting,
made necessary for food for life. The
second crop had matured when the
beetles once more appeared, but
scarcely had they begun their depre-
dations before there came great
flocks of prairie gulls and ate up all
of the beetles, thus saving the crops,
and the very lives of the pioneers.
Out of thankfulness the monument
to their memory was erected, show-
ing two life-sized gulls of bronze at
its apex.After the lecture some exquisitely
colored pictures of the lovely gar-
dens belonging to Mrs. Charles Tap-
pen, Mrs. John D. Schoonmaker,
Mrs. Ed. Coykendall, Mrs. George
Washburn, Mrs. De Forest Smith,
Mrs. George Hutton, Mrs. Charles
De La Vergne, Mrs. Williams Carter,
Mrs. George Burgevin, Mrs. Charles
Finch of Kingston; Mrs. John Wash-
burn, Mrs. Phelps, Mrs. Clark Reed
and Mrs. Kelley of St. Remy were
shown, together with a few pictures
from other Garden Club gardens.

As Many a Wife Knows,

The poor that we have always with
us includes poor excuses.—Boston
Transcript.

NEWSPAPER CONSUMPTION.

If all the daily newspapers in the
United States were cut into strips of
paper as wide as the regular daily
paper they would form a ribbon 40-
000,000 miles long or more than half
the distance to the sun. These same
newspapers would also make a strip
two feet wide holding the world 16,000
times.—The Thrift Magazine.BAD BLOOD RUINS
COMPLEXIONSPepto-Mangan Makes Rich, Red
Blood—Liquid or Tablets.

The woman whose complexion is

muddy and almost sallow has blood
that is clogged with poisons. She
awakens in the morning with a lan-
guid feeling. She seems to have no
energy at all.Her blood is weak and thin and
she needs to take Gude's Pepto-Man-
gan for a while, as thousands of
women do when they feel run down.
It makes rich, red blood. Where
blood was thin and weak it be-
comes rich and red. Then that wo-
man who has had such a bad com-
plexion and has found it so hard to
do things, begins to look a lot ros-
ier. She doesn't look so droopy and
tired. In a little while the look on
her face brightens, her complexion
clears up, and she feels happier.The druggist in your neighbor-
hood sells Gude's Pepto-Mangan. It
has been recommended by doctors
for years. There is the liquid and
tablet form. Take your choice be-
cause the medicinal value is the
same. The name "Gude's Pepto-
Mangan" is on each package.—Ad-
vertisement.SUPERVISORS
BEGIN SESSION

The annual session of the county

legislature began at the rooms of
the Board of Supervisors Tuesday
evening and was a short one the
usual stock resolutions being in-
troduced and adopted.

The annual report as to mortgage

tax receipts was received from
County Clerk C. K. Loughran, read
and referred to the Committee on
County Treasurer and Sealer. The
total amount received was \$24-
123.80; expenses \$384.72; retainer,
\$51.15; amount paid over to county
treasurer, \$20,732.32.Chairman Saxe announced that
the standing committees would re-
main the same as last year with
the exception that Elias Auenhney
of Rosendale, would take the place
on the Committee of Highways and
on Committee on Town Expenses
in place of James H. Hlasbruck,
deceased.Supervisor Fratscher moved that
warrants be issued to the several
towns for the amount of the mort-
gage tax, etc. Adopted.Supervisor Upright moved that
the county treasurer be authorized
to extend the time for the collec-
tion of taxes levied by the board on
each town until the first day of
April 1922. Adopted.Supervisor Avery moved that the
collectors of the town be required
to accept town warrants in pay-
ments of taxes. Adopted.Supervisor Segendorf moved that
the clerk of the board, mail blank
collectors' bonds to the collectors of
the several towns. Adopted.Supervisor Schermerhorn moved
that for all bills and claims against
the county treasurer be issued on
the first day of March next. Adopted.Clerk DeWitt stated that every-
thing was ready for the committee
on equalization to start at work on
Wednesday morning. Supervisor
Fratscher, chairman of the commit-
tee, suggested that the matter be
deferred until next Monday, at 2 p.
m.On motion of Supervisor Frank
M. Brink all former supervisors
were given the privilege of the
floor.On motion of Supervisor Van
Aken the board of supervisors ad-
journed until Wednesday evening at
7:30 o'clock.
